LOCAL AND PERSONAL.

G. T. Littlefield was an Elida visitor Tuesday.

Salesm n Oliver of the Joyce-Pruitt Co., was taking orders in Kenna Monday.

J. O. Grant is home again on his claim. He had been at Roswell, working.

Mrs. E. B. Prothro left last Friday for Longview, Texas, to visit her husband.

The little child of Jess Hopkins' that has been so seriously sick is reported better.

Jess Holland and wife came up from Roswell last Saturday and went out to their claim southeast of town.

Miss Edna Bryan is teaching in the Hawkey Valley this term She began her school last Monday.

Otto Buchholz came up from Roswell last Tuesday and went out to his claim, to take care of his feed crop.

The Railroad Company has had a gang of Mexicans, about 40, at work on the switches here this week.

W. B. Scott made another Roswell trip this week, This time he went in the interest of his Mansonic connections.

John Keller returned from the Plains the first of the week. He had been away with a lot of the Sherman horses, which were thrown on the market for sale.

Our correspondents seem to be taking a rest. They probably hold that they have six months in which to resume their service, the same as a claim holder has to get onto his land

Commissioner Chancey got his seal the first of the week and is now prepared for all the land office work that comes to his desk. He will work in both districts, the Roswell and the Ft. Sumner, and cover the same field the former Commissioner took care of

by local applications, as they cannot reach the dis-sared portion of the car. There is only obe way to sure destrues, and that is by constitutional remedian Deathers is caused by an inflamed condition of the autonomal lating of the Emitochian Tube. When the autonomal lating is the Emitochian Tube. When the autonomal lating is the Emitochian lating could be aken out and this tube recovered to its normal condi-tion, hearing will be destroyed forever; nine cases, and of ten are existed by Catarrh, which is solubing but an inflamed condition of the mucous surfaces. We will give one different by the emitochian but an inflamed condition of the mucous surfaces. We will give one Hundred Dollars for any case of Scales in fraused by Catarrh, which is solubing the Hall's Catarrh Circ. Send for circulars, free. F. J. (HENDLY & CO), Toleda, a. Scale Hall's Family Pills for constipation. Deafness Cannot Be Cured

ANOTHER WELL FLONS.

A few weeks ago we gave at account of a well on John Boatwright's claim which was, and still is, over-flowing periodically, Now another well is "acting up." This one is on H. I White's claim, two miles 3.11 of town Last Sunday it began it's capers. The well was dril'. ed in May, 1907, but this is the first time it has flowed. T 8

Thereby giving you the lowest of prices.

Don't Forget The Place.

water comes from the pipe in an agitated condition, and is full of s nall bubbles. The flow is probably porduced by a formation of gas in the pipe, or rather forced into the pipe, at the bot-

We had a big 3-ring Circus and Menagerie at Kenna today. That is, the show outfit passed through our town on the railroad, and we had the privilege of shading our eyes adn seeing them glide by.

FOR SALE OF TRADE.

I have a stout two-seated hack, with leather top, which I will sell or trade for a driving horse or for cattle. It is nearly new and worth more than I will isk for it.

W D Chancey.

Forced To Leave Home

Every year a large number of poor sufferers whose lungs are sore and racked with coughs are urged to go to another climate. But this is costly and not always sure. There's a better way. Let Dr. King's New Discovery cure it home. "It cured me of lung crouble," writes W. R. Nelson, of Calamine, Ark, "when all else failed and I gained 47 poun's a weight. It's surely the King of all cough and lung cures. realth to it. It's positively guaranteed for Coughs, Coids, LaGrippe, Asthma, Croup—all including the peculiar bright red color Throat and Lung troubles. 50c of the blood. From experiments made by Dr. von Vahlen, at Halle, it seems Drug ists.

Not Proper Comparison. The old darky had driven his fare o the hotel and was now demanding dollar for his service. "What!" proested the passenger, "a dollar for that 'istance? Why, it isn't half a mile as be crow flies." "Dat's true boss," re urned Sambo, with an appealing mile, "but y' see, suh, dat old crow he 'n't got free wives an' ten chilluns to sppoht not to mention de keep fob le hoss."

SHOWING VALUE OF THE HEN

If It Could Be Capitalized Its Product Would Pay Bigger Dividends Than Railroads.

It is claimed that the average production of a hen is 200 eggs per annum, but it is safe to assume that the actual is much below this figure, the Wall Street Journal says. Adopting the very conservative figure of 120 eggs per hen per annum, we find on the above basis of production there 150,000,000 laying hens in the United States responsible for the production of 18,000,000,000 eggs.

At the farm price of 20 cents per dozen the total income derived from each hen annually would amount to two dollars. Allowing 40 cents for maintenance and ten cents for depreciation, which latter would wipe out the market value of the hen in four years, irrespective of salvage when the period of production is over, the net profit per hen per annum amounts to \$1.50

This profit, according to Wall street standards, capitalized on a five per cent, income basis, would place nominal value of \$30 on each hen. For the 150,000,000 hens this would amount

to the enormous total of \$4,500,000,000 That the American hen can return a yield of five per cent, per annum on a capitalization of \$4,500,000,000 appears nothing short of remarkable but such is the case. The entire out standing capital obligations of the railroads of the United States in 1907 were less than four times this amount or \$16,082,146,683, while the total paid out in interest and dividends repre sented but 4.05 per cent. of this

THE POISONS IN COAL GAS

Many Are Known, But There is One Constituent That Is a Puzzle to Scientists.

The poisonous properties of coal gas are generally attributed to its content of carbonic oxide, especially as no other substance of known poisonous l'housands owe their lives and properties has been found in it, and patients suffering from coal gas poison ing show the symptoms associated and \$1,00. Trial bottle free at all probable that we must revise this view, for on making experiments with frogs, animals particularly resistant to carbonic oxide, it was found that they were poisoned far more rapidly by coal gas than by the corresponding amount of the oxide. Other experiments with dogs showed that the poisonous effect of coal gas was twice or three times Very cunning men allwass g t as great as that of the carbonic oxide it contained. Evidently there is some caught at last. When a fox gits other constituent of coal gas which is polsonous, though what it is cannot yet be stated. Merely removing the can endure him, all turn out and carbonic oxide from coal gas will not suffice to render it non-poisonous .-The Ironmonger.

Gladstone's Memory.

Gladstone's power of memory was always one of his greatest assets. In his last years he often lamented that it was not what it had been; but even so, it came triumphantly out of some remarkable tests. In his eighty-third year he set himself to recall Manzoni's

period when they continually walk around their chair.

Bixty thousand pairs sold lest year Over two hundred thousand pairs now in us. year he set himself to recall Manzoni's ode on the death of Napoleon, which, as a young man, he had translated into English. He had entirely forgotten his own version, but by dint of hard "digging" or "fishing up," as he called it, he wrote down 104 of the 108 Italian lines. Two years later he essayed to write from memory a complete list of all the men who had been his cabinet colleagues, and enumerated 60 of the 70.

Those Who Need it.
